

Distributed Energy Road Show

Distributed Energy Resources...The Power of Choice

Next Stop:
Long Island, N.Y., on
October 2!

The U.S. Department of Energy's Distributed Energy Road Show is coming to you!

We're traveling across the nation to help streamline siting and permitting processes for new distributed energy technologies and we're headed to your area!

Suffolk County, N.Y., and the U.S. Department of Energy are co-hosting a Road Show in Hauppauge, N.Y. (on Long Island). Participants will learn the ropes of installing, operating, and interconnecting these new technologies from the experts — technology manufacturers and distributors, fuel experts, and state and local offices for energy and the environment. Discussions will focus on local siting, code, and permitting issues and fuel production and storage safety. Solar/PV and wind technologies will be discussed, and participants will receive hands-on training with fuel cells, microturbines, and more.

Come "kick the tires" on the latest energy technologies for your business, home, or facility! Registration is free!

Thursday, October 2, 2003, 8:30am - 4:30pm

William Rogers Legislative Building
725 Veterans Memorial Highway
Hauppauge, NY 11788

Attire: Business Casual

To register for this Road Show, please contact:
